Motors in stock

SERVICES

We challenge ourselves to provide the best service to our customers.

Our activities revolve around the sale, transformation (reconditioning, customization), distribution and rental of industrial electrical equipment.

We attach great importance to providing our customers with sustainable, energy-efficient solutions, which can sometimes support the circular economy through the rental and reconditioning of used motors.

Sales

A large stock of motors is available to meet our customers' needs and ensure maximum flexibility.

Customization

Our team of experts modifies our engines according to our customers' specifications and needs, whether for short- or long-term projects.

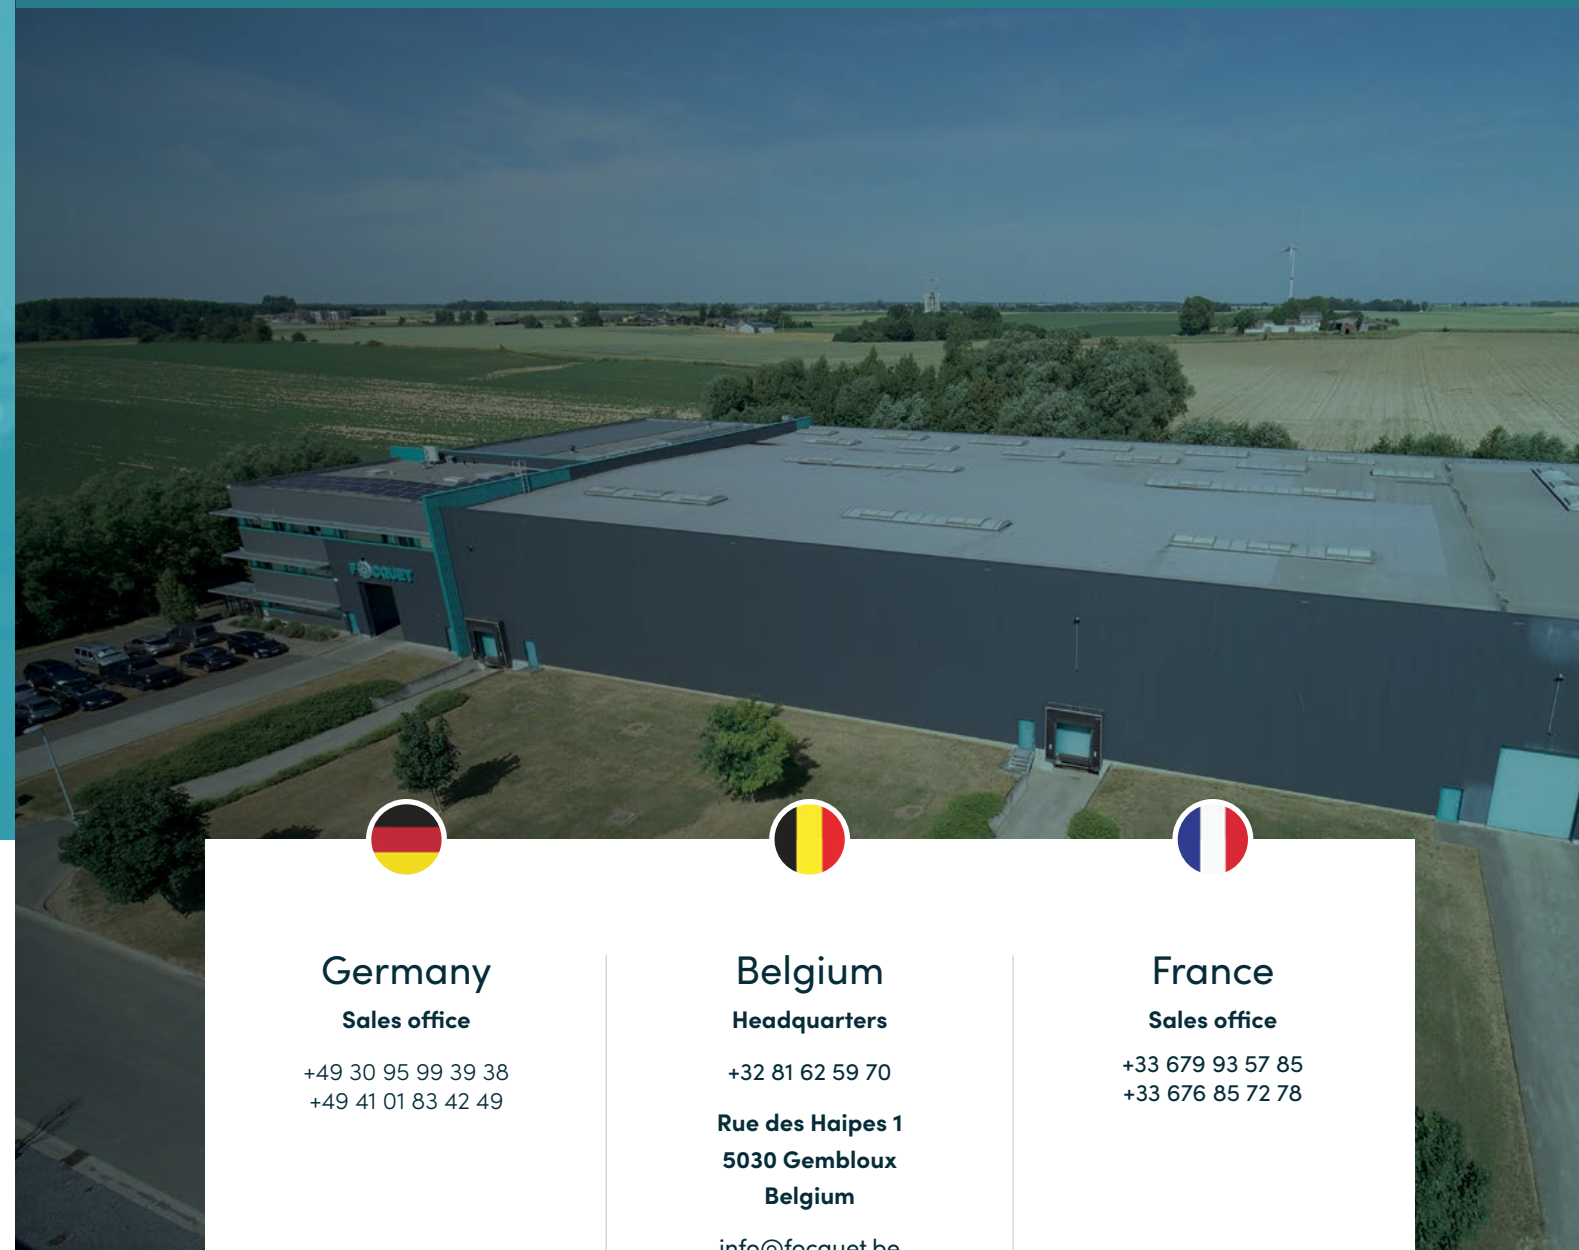

Rental

Our motors and transformers are available for rental to provide a quick, low-cost troubleshooting solution.

Transportation

We offer a variety of delivery options, including standard delivery in 24-72 hours and express delivery in less than 24 hours, to meet your urgent requirements.

Industrial electrical power equipment

SALE / CUSTOMIZATION / RENTAL
RECONDITIONING / PURCHASE

We support your needs with a team of highly qualified and trained professionals offering **flexible and qualitative solutions**.

These four strengths are the key factors to our success. Over the years, they have enabled us to build up a large customer base and establish client relationships based on trust.

In addition, we place great emphasis on a workforce that offers direct, personal advice before, during and after the purchase/ rental of electrical equipment.

This personal contact is essential for us to understand our customers' needs and offer them the right solutions.

OUR ELECTRICAL SOLUTIONS

- Electric motors
- Industrial transformers
- Industrial pumps
- Power electronics
- Gearmotors

We customize and adapt motors and other electrical equipment to meet your specific needs.

WHO ARE WE?

Focquet is active in all sectors relating to electrically driven industrial power equipment:

Electric motors / Transformers / Power electronics / Industrial pumps / Gearmotors

Our activities within these departments focus mainly on the sale, transformation (reconditioning and customization), distribution and rental of electric industrial power equipment.

Our stock of over 16,000 motors is one of the largest available in Western Europe, which allows us to respond easily and rapidly to all specific requests, whether for new or second-hand equipment. Our own range of new motors, stamped under one of our two brands, 2EC or FOCQUET, stand out for their quality and competitive prices.

Moreover, our workshop, made up of a dozen qualified professionals, provides a high-

performance service in terms of customization of engines so that they perfectly meet our customers' needs. Focquet offers tailor-made solutions to meet our customers' most demanding specifications, such as additional protection, heaters, forced ventilation, specific mounting forms, specific paintwork, etc.

Our in-house technical expertise and compact structure enable us to respond quickly to our customers' needs and provide them with technical support, whether for a standard order or a long-term project.

Our stock, reactivity and technical expertise are Focquet's major assets, enabling us to satisfy our customers as quickly as possible.

OUR PRODUCTS

Five departments are at the heart of our activities.

1. Electric Motors

We offer quality electric motors for a wide range of industrial applications.

AC INDUCTION MOTORS

- > IP55 cast iron motors up to 1400kW
- > IP55 aluminum motors up to 22kW
- > IP23 open ventilated motors up to 1400kW
- > Slipring motors up to 630kW
- > High-voltage motors up to 2240kW
- > Single-phase motors up to 3.7kW
- > Brake motors up to 55kW
- > Stainless steel motors up to 18.5kW

DC MOTORS

- > MAGNETIC - SICME up to 123kW
- > ANSALDO - NIDEC up to 810kW
- > STIPAF up to 574kW
- > FEMSAN up to 200kW

SECOND-HAND MOTORS

These squirrel-cage, slipring or DC motors are reconditioned and tested in our workshop to ensure optimal service. Our stock includes second-hand motors from 15kW to 5MW.

2. Industrial transformers

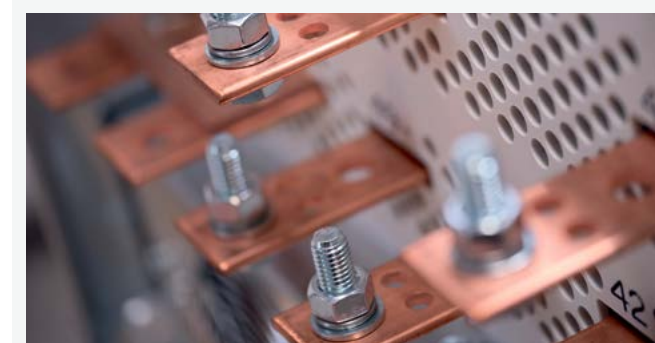

Our stock consists of around a hundred transformers (low and high voltage) up to 3MVA that can be rented or sold.

- > Low voltage up to 200kVA
- > High voltage up to 10MVA

3. Industrial pumps

We offer various solutions for industrial pumps. We provide two solutions in our product range: thermal oil transfer and water transfer.

- > Overhaul workshop for all brands
- > Sales of water & thermal oil pumps
- > Assembly of pump units with short lead times

4. Power electronics

In our product range, we offer both DC and AC drives.

- > DC drives 4Q up to 1kA
- > Static frequency converters up to 1.5MW
- > Soft starters up to 355kW

5. Gearmotors

We offer a wide range of high-quality gearmotors that are easily interchangeable and available on short notice.

- > Hypoid gearboxes
- > Parallel shaft gearboxes
- > ...

We are able to supply other power levels not included in these ranges, on request.

For us, your needs are our challenges!

Quality guarantee

We have been guaranteeing high-quality products in our market segments for more than a century. Our team of specialists offers unique know-how and ensures an optimal quality of our electrical equipment.

Customized work

Our workshop transforms and adapts motors to meet the specific demands of our customers. Highly qualified professionals guarantee fast and high-quality changes and thus ensure the flexibility of our company.

Available stock

Our large stock, comprising both new (90%) and second-hand (10%) equipment, allows us to respond quickly to all demands of rotating machines, transformers, pumps and power electronics.

Reactivity

We ensure optimal reactivity of our services by ensuring fast and efficient modifications of our products and deliveries. Our extensive stock and reactive staff allow us to offer quick solutions to our customers.
